Chest Pain Case

Welcome to the Virtual Interactive Case (VIC) Player. Please begin by reading the presenting complaint to your right. When you are finished, you may begin your examination by clicking on the options in the patient examination menu above.

Take a focused history and review of systems, and conduct a physical exam in the most efficient and cost-effective way to reach a diagnosis. Each action you take will add to the time and cost of arriving at the diagnosis. The essential actions to discover the pertinent findings will contribute to a score which reflects your success in assessing all the pertinent findings.

When you feel confident that you have reached a diagnosis, finish the case by clicking on Diagnosis & Management above.

Mrs. Jones has arrived in the emergency department complaining of chest pain.

Please select a sub-menu option.

The VIC Editor allows you to create new cases, edit existing cases and copy actions from one case to another. The main functions of the Editor are accessed from the tabs at the top of the screen.

Play Simulation

- This tab opens the case that is being edited in the VIC Player, allowing you to see how the changes you have made will appear when the case is played. When in the Player mode, this tab changes to "Edit case", which will return to editing the case.

New Editable Case

- This tab creates a new case with standard headings and sub-menu items, but no actions. Use this option for building a case which is not based on any other case, nor a template.

Open Editable Case

- This tab allows the selection of an existing case to open for editing. You can also use this option to create a new case based on a template case. Open the template case

Main tabs

There are six tabs across the top of the screen for categorizing the actions. The default labels for these categories are: Patient History, Physical Examination, Functional Assessment, Laboratory Tests, Diagnostic Imaging and Consultation. These labels can be edited by clicking on a tab, then clicking the edit button in the top right corner of the screen. The label has a limit of 21 characters including spaces.

Sub-menus

- The actions in each main tab are grouped in sub-menus. A new sub-menu can be added by clicking the add (+) button to the right of the sub-menu.
- When a sub-menu is selected, it can be edited by clicking the edit button, or deleted by clicking the delete (x) button to the left of the sub-menu. NOTE: Deleting a sub-menu deletes all the actions in that sub-menu.
- Currently, there is no feature for reordering the sub-menus, so keep this in mind when creating sub-menus.
